PREFACE

The Directory of State, Territorial, and Regional Health Authorities is a publication designed to present useful information to persons engaged in administering grant programs of the Health Services and Mental Health Administration. It is also a source of information for anyone engaged in health or health related activities.

The Directory contains detailed information on the authorities having responsibilities connected with HSMHA programs for comprehensive health planning; crippled children services; hospital and medical facilities construction; mental health activities; and regional medical programs.

This year's edition has been expanded to include a section concerning the Areawide Comprehensive Health Planning Agencies. The Directory also includes an organizational chart for the Health Services and Mental Health Administration and a listing of the HSMHA Regional Health Directors.
